*** META Tags are provided by the client

Most websites usually take me 2 or 3 days to complete. What makes it easier for me to get the site completed is:

- **Having all the content up front**
- **Having the site reviewed quickly once I have added the content**
- **Any and all changes given to me, so I can make them and have it reviewed again**

I have a Content Information Sheet that you will fill out that will make sure I have all the information I need to complete your website.

If you have any questions, please contact me.
